Introduction

This implementation statement (“Statement”) is produced alongside the Trustee Report and Accounts and is required by pensions regulations¹. The Trustee of the UPM-Kymmene UK Pension Scheme (the “Trustee”, “we” or “our”) has prepared this Statement to provide stakeholders with a transparent and accurate review of how it has acted in line with the stewardship and engagement policies set out in the Statement of Investment Principles (the “SIP”) for the UPM-Kymmene UK Pension Scheme (the “Scheme”) during the accounting year.

This Statement includes details of:

- Compliance against the stewardship and voting policies;
- Any changes made to the stewardship and voting policies (“Stewardship Policy”) during the year; and
- Specifically, how the Scheme’s investment managers voted and engaged on our behalf.

This statement has been prepared by the Trustee to cover the period 1 April 2022 to 31 March 2023 and relates to the Defined Benefit (“DB”) assets only. For the avoidance of doubt, the Scheme historically also had a Defined Contribution (“DC”) section, which has now been transferred out.

The Statement is publicly available at: [UPM UK Pension Scheme \(myupmpension.co.uk\)](https://myupmpension.co.uk)

Executive summary

The day to day management of the Scheme’s assets is delegated to Cardano Risk Management Limited (the “Fiduciary Manager”). In advance of the appointment, the Trustee took steps to ensure that the management of the Scheme’s assets and the Fiduciary Manager’s policies were aligned with the Trustee’s own policies. The Trustee continues to monitor the Fiduciary Manager, as part of its regular interactions with them.

We monitor the voting and engagement activity of the Scheme’s investment managers, and, through the Fiduciary Manager, challenge their decisions.

The Trustee focuses its efforts on those investment managers where voting and engagement is material. The policies of those investment managers are summarised in this Statement, along with examples of the type of activity which took place during the period covered by this Statement. Some of the investment managers use investment approaches where stewardship is less likely to be relevant or significant. The Trustee is comfortable that our Fiduciary Manager has an appropriate approach to assess the stewardship and voting policies for all investment managers, and we receive a summary of the Fiduciary Manager’s overall assessments once a quarter.

¹ The Occupational and Personal Pension Schemes (Disclosure of Information) Regulations 2013 (as amended)

1. Our Stewardship Policy

1.1. What is Stewardship?

“Stewardship” is the responsible allocation, management and oversight of capital to create long-term value for members, which should also lead to sustainable benefits for the economy, the environment and society. In practice, stewardship is affected through exercising the right to vote on any shares which are owned by the Scheme and engaging with the management of any companies or properties where an investment has been made.

1.2. What is our Stewardship Policy?

The Stewardship Policy in force during the financial year was:

“Financially material considerations over the appropriate time horizon of the investments

The Trustee has a long-term time horizon for their portfolio and therefore acknowledges the importance of being a responsible investor. The Trustee considers responsible investment to be the integration of environmental, social and governance factors into investment decisions in respect of their portfolio where financial risk and / or return is or could be materially affected (“Responsible Investment”).

The Trustee has delegated responsibility to take account of environmental, social and governance factors (ESG) in investment decision making to the Fiduciary Manager. This includes investments made directly by the Fiduciary Manager as well as those in pooled funds managed by third parties. In the latter case, where new investments are made with external investment managers, the Trustee expects the Fiduciary Manager to take into account ESG (including but not limited to climate change), consistent with its approach to Responsible Investment. The Fiduciary Manager is responsible for monitoring how external investment managers take into account ESG within their investment process. Monitoring by the Trustee of the Fiduciary Manager is undertaken on a regular basis.

The Trustee does not take the views of individual members and beneficiaries, including (but not limited to) their views in relation to governance, social and environmental impact, into account when making investment decisions. The Scheme’s assets are largely held in pooled arrangements therefore, it is not possible to reflect individual member views. However, the Trustee believes that by being a responsible investor, it is managing investment risk with the aim of enhancing long term portfolio returns, which is in the best interests of the members and beneficiaries of the Scheme.

The exercise of the rights (including voting rights) attaching to the investments

The Trustee’s policy is to delegate responsibility for the exercising of rights (including voting rights) attaching to investments to the investment managers. The Fiduciary Manager encourages the Scheme’s investment managers to discharge their responsibilities in respect of investee companies in accordance with the Stewardship Code published by the Financial Reporting Council.

The extent to which non-financial matters are taken into account in the selection, retention and realisation of investments

The Trustee believes that by being a responsible investor, it is managing investment risk with the aim of enhancing long-term portfolio returns, which is in the best interests of the members and beneficiaries of the Scheme. Beyond these requirements of responsible investing, the Trustee does not explicitly target any non-financial matters in their investment decision making.

Undertaking engagement activities in respect of the investments

Where relevant, the Trustee prefers its investment managers to have an explicit strategy, outlining the circumstances in which they will engage with relevant persons (an issuer of debt or equity, an investment manager, another stakeholder or holder of debt or equity) on relevant matters (including performance, strategy, capital structure, management of actual or potential conflicts of interest, risks, social and environmental impact and corporate governance matters) and how they will measure the effectiveness of this strategy.

In practice, the Trustee would not typically expect to engage directly, but rather via the investment managers or Fiduciary Manager. The Fiduciary Manager is responsible for engaging with investment managers regarding those investment managers' voting records and level of engagement with the underlying investments, where this is expected to have meaningful impact.

Stewardship policies and voting records are reviewed (and discussed with the investment managers) at least annually by the Fiduciary Manager, who will collate the qualitative and quantitative information required to allow the Trustee to review all of the above aspects in sufficient detail each year. The Trustee will challenge any arrangements or stewardship practices that do not align with their Responsible Investment approach."

Engagement

The Fiduciary Manager is responsible on an ongoing basis for engaging with our investment managers. For managers where it is expected to have a meaningful impact, the Fiduciary Manager monitors voting records and the level of engagement with underlying investments.

The Trustee has recently selected three stewardship priorities for manager engagement in order to improve alignment against our policies and beliefs as well as enhance disclosure. These priorities are linked to the UN Sustainable Development Goals with an international endeavour in mind, and aim to improve sustainability within the portfolio and have a direct real world impact to our members' current and future landscape. The Trustee's three stewardship priorities are:

- **Climate Crisis** (with a focus on climate change and net zero greenhouse gas emissions)
- **Environmental Impact** (with a focus on biodiversity, deforestation and water)
- **Human Rights** (with a focus on living wages gender equality and health & nutrition)

On behalf of the Trustee, the Fiduciary Manager has recently written to the Scheme's investment managers reaffirming and expanding on the Trustee's policy and expectations which align with our stewardship priorities. The Trustee expects the investment managers to incorporate these themes into their future voting practices and the Fiduciary Manager will monitor future manager disclosures to ensure alignment against our priorities.

1.3. How have we implemented our Stewardship Policy?

Scheme structuring

The Trustee holds investments primarily on an indirect basis through pooled funds. The reason for this approach is that:

- It provides a broader range of investment opportunities, which helps to improve the diversification of investments, which in turn helps to manage risk;
- Fixed costs are shared amongst other investors, thereby reducing our overall costs; and
- It simplifies the implementation process as existing funds can be used with standard terms and agreements, reducing the overall governance burden both on the Trustee and the Sponsor.

Where investments are made in pooled funds the Trustee follows the voting and engagement policies of the investment managers of the pooled funds. However, the Trustee remains responsible for ensuring that the investment managers our Fiduciary Manager appoints act consistently with the Scheme's Stewardship Policy.

External engagements

The Trustee assesses that the Fiduciary Manager has been aligned with our Stewardship Policy throughout the year. The Fiduciary Manager has been a signatory to the UN Principles for Responsible Investment since 2011 and they are a signatory to the UK 2020 UK Stewardship Code.

In addition, the Fiduciary Manager is a member of a range of sustainable investment organisations, these are noted below.

Engagement beliefs

The development of engagement beliefs is an important Trustee responsibility. We have delegated the day-to-day implementation of our beliefs to the Fiduciary Manager, having concluded that the Fiduciary Manager's core beliefs are consistent with our own. The beliefs driving the Fiduciary Manager's approach to engagement are as follows.

Quality over quantity

- The Fiduciary Manager is interested in a few meaningful quality engagements, with strong reporting (rather than, being interested in the quantity of votes). They want managers to prioritise the highest sustainability impacts in their portfolios

Long-term

- The Fiduciary Manager encourages underlying managers to form long-term relationships with companies. Successful stewardship can take many months, maybe even years

Real world impact

- The Fiduciary Manager is interested in engagement on topics that contribute to positive real-world sustainability impact (such as, reduction in absolute carbon emissions)

Transparency

- Some engagement, perhaps even most engagement, will be unsuccessful. The Fiduciary Manager is realistic, and they prefer transparency from managers

Collaboration

- Engagement is more efficient when managers collaborate – not just for the managers, but for the companies too (who will field fewer, but higher conviction, engagements from their investors). The Fiduciary Manager encourages underlying managers to participate in collaborative initiatives, such as Climate Action 100+

Innovation

- The Fiduciary Manager welcomes innovation, for example, third-party tools to assess a company's conviction on sustainability topics

Integrated

- The Fiduciary Manager is interested in how (if at all) stewardship contributes to the investment thesis and whether managers link their stewardship to other engagement activity (for example, policy engagement)

Manager selection and monitoring

When selecting investment managers, the Fiduciary Manager scrutinises the stewardship, voting and engagement policies. Activities of investment managers are assessed before the initial investment to ensure they align with our Stewardship Policy. The Fiduciary Manager monitors our investment managers on an ongoing basis; ensuring their activities align with our Stewardship Policy and engaging with our investment managers to help them improve their stewardship approach.

The Fiduciary Manager closely monitors investment managers who do not meet our stewardship standards and actively works with them to improve their policies, processes and reporting.

The Trustee monitors voting and engagement activity of our investment managers and challenges their activity through the Fiduciary Manager. We categorise our managers according to how material voting and engagement is in their mandate. The Trustee focuses its efforts on any managers where voting and engagement is material.

The Scheme invests in a series of Private Market and Real Estate investments. A critical means of value creation for many such strategies is ensuring that each business or asset has the best governance possible. For example, the Scheme's Real Estate investment is via a fund which owns large properties. A crucial part of their ongoing management is evaluating how environmental factors (such as energy efficiency, waste disposal, water supply and carbon footprint) will impact. Social issues also play an important part, through factors such as health & safety standards, workers' rights and diversity / inclusion standards.

Compliance statement

To the best of our knowledge, the Trustee has complied with the Stewardship Policy over the year.

2. Voting Activity

The Shareholder Rights Directive (SRD II) and the UK Stewardship Code 2020 both emphasise the importance of institutional investors and asset managers engaging with the companies in which they invest. They stress the importance of exercising shareholder voting rights effectively. Voting only applies to equities held by the Scheme and as most investments are made using derivatives, there is limited scope for the Trustee to directly influence voting.

2.1. How did our managers vote?

The tables below provide a summary of the voting activity undertaken by our managers during the year.

Note: All investment managers that the Scheme invests with, directly or indirectly, are subject to the Scheme's engagement policy and monitored accordingly. The managers included in this section denote those where voting and engagement are seen as material aspects of their investment process, rather than necessarily those investments we have the largest exposure to. In some cases, aspects of a manager's voting activity may not be included in this document; where we have concerns that public disclosure prohibit the investment strategy of the Scheme

iShares Core FTSE 100 UCITS ETF

	Manager response
Number of meetings the manager was eligible to vote at over the year	117
Number of resolutions the manager was eligible to vote on over the year	2,213
% of eligible resolutions the manager voted on	100%
% of votes with management	97%
% of votes against management	3%
% of resolutions the manager abstained from	0%

2.2. Use of proxy voting services

Proxy voting services are specialist firms that provide an outsourced voting service. Some investment managers choose to use these services (rather than vote themselves). The reasons for using proxy voting services could include:

- The investment manager lacks the resource to research each vote and submit votes
- The investment manager wants to follow a recognised code of practice and the proxy voting service is an easy way to implement this

Using a proxy voting service does not necessarily mean that voting is done poorly. In fact, many professional proxy voting services are able to devote significant resource to researching AGM motions and are able to follow best practice guides like the Financial Reporting Council's (FRC) Stewardship Code.

We recognise that by having a suitable Stewardship Policy in place and using our Fiduciary Manager to monitor voting activity, investment managers can create more engagement over time; particularly smaller,

more boutique managers with less in-house expertise and resource.

The table below outlines the use of proxy voting services by the Scheme's investment managers where voting is deemed to be of material importance.

Manager	Use of proxy voting service
iShares Core FTSE 100 UCITS ETF	They use Institutional Shareholder Services' (ISS) electronic platform to execute vote instructions, manage client accounts in relation to voting and facilitate client reporting on voting. In certain markets, they work with proxy research firms who apply proxy voting guidelines to filter out routine or non-contentious proposals and refer any meetings where additional research and possibly engagement might be required to inform the voting decision.

3. Engagement Activity

Engagement is considered to be purposeful dialogue with a specific and targeted objective to achieve positive change in the interests of beneficiaries, thereby a key action required for delivering good stewardship. The Fiduciary Manager is passionate about active engagement, as opposed to disinvestment or exclusions practices, in order create positive real-world change. Through engagement, asset managers can build relationships with the companies in which they invest, helping to steward companies on a range of topics, including sustainability.

The tables below provide examples of engagement activity of the Scheme's investment managers where engagement should be a material activity in the management of the assets.

iShares Core FTSE 100 UCITS ETF

Company Name	Date of Vote	Summary of the resolution	How the manager voted	Rationale / Outcome
Barclays	04 May 2022	To approve Barclays' Climate Strategy, Targets and Progress 2022	For	Approved
